Professional Profile

Experienced Senior PHP Developer with over 14 years of experience working on high-load projects and corporate platforms. An expert in the development, optimization, and integration of complex web applications using modern technologies. Strong skills in backend development, database management, performance optimization, and system architecture design. Extensive experience working in Agile teams, with a focus on code quality, test automation, and team collaboration.

Key Skills

- Programming Languages: PHP (versions 7, 8), JavaScript, Go
- Frameworks: Symfony4, Laravel, Phalcon
- Databases: MySQL, PostgreSQL, Redis, Memcached, MongoDB
- Testing and Automation: PHPUnit, Codeception
- Containerization: Docker
- Web Technologies: AJAX, jQuery, JSON, Ext JS
- **Version Control Tools**: Gitlab, Bitbucket, Github
- **Project Management and Task Tracking**: Jira, YouTrack

Work Experience

Rambler&Co (March 2024 — Present)

Senior PHP Developer

- Responsible for developing company services using modern technology stacks, including PHP8, Symfony4, MySQL, Codeception, PHPUnit, Docker, and Go.
- Optimizing and supporting high-load systems, working with APIs and microservices.
- Executing tasks in new feature development, bug fixing, and testing.

Lamoda (October 2022 — February 2024)

PHP Developer

- Upgraded PHP from version 7.4 to 8.1, optimized pipelines, and updated Symfony components, enhancing system stability and performance.
- Developed services for generating DataMatrix codes in compliance with legal requirements.
- Conducted code reviews, testing, and created technical documentation for critical functionalities.
- Technologies: PHP8, Symfony4, PostgreSQL, Codeception, PHPUnit, Docker.

Rambler&Co (November 2021 — July 2022)

Senior PHP Developer

- Participated in developing high-load services for the company, providing support and testing.
- Fixed bugs, conducted code reviews, and enhanced backend architecture.
- Technologies: PHP8, Symfony4, MariaDB, PHPUnit, Go, Docker.

PAO MTS Bank (November 2020 — November 2021)

Senior PHP Developer

- Completed full-cycle project development from scratch, establishing a microservice-based architecture.
- Developed on Laravel using the Orchid library, integrating with PostgreSQL and Redis, creating tests, and documentation.
- Actively contributed to the orchid.software project by implementing new features and resolving issues in collaboration with the product owner.
- Organized and evaluated tasks, interacted with the development team, and made product recommendations.
- Technologies: Laravel, Orchid library, PostgreSQL, Redis, PHPUnit, JavaScript, Docker.

ETP GPB (November 2016 — August 2020)

Senior PHP Developer

- Developed and supported features for the etpgpb.ru project, integrating new modules and enhancing scalability.
- Worked with high-load systems at multiple levels, including backend and databases.
- Technologies: PHP 7, Phalcon Framework, Laravel, PostgreSQL, Redis, Memcached, Sphinx, JavaScript, Ext JS, Gitlab, YouTrack.

Avito (July 2016 — October 2016)

PHP Developer

- Supported and improved the avito.ru project, implementing APIs for payment system integration.
- Optimized databases and introduced enhancements to improve service performance.
- Technologies: PHP, PostgreSQL, Redis, Memcached, Sphinx, JavaScript, AJAX, jQuery.

Mamba (July 2015 — July 2016)

PHP Developer

- Supported and developed innovative features for the tourbar.com project, integrating APIs for social networks and payment systems.
- Optimized existing code to enhance stability and performance.
- Technologies: PHP, HTML5, MySQL, JavaScript, AJAX, jQuery, Redis, Memcached, Sphinx.

Sutochno (October 2011 — July 2015)

PHP Developer

- Advanced the sutochno.ru project from a prototype to a fully functional system, developing modules for payment system and social media integration.
- Created a payment processing system utilizing Robokassa, PayU, and Yandex.Kassa.
- Supported and integrated additional projects, including arhinovosti.ru and simbirsk.rf.
- Technologies: PHP, HTML5, MySQL, JavaScript, AJAX, jQuery, MongoDB, Sphinx.

Education

Ulyanovsk State Technical University
Specialization: Informatics and Computer Engineering
Year of Graduation: 2012

Additional Training

2015
Course: Software Development Project Management and IT Solutions
Module: "IT Project Management", customized training course.

Project Examples

Payment System Management (for Avito)

Stack: PHP 7, PostgreSQL, Redis, Memcached
Developed and optimized APIs for payment system integrations, enhancing database efficiency to handle millions of records.

Advertising and Targeting System Modules (for Rambler&Co)

Stack: PHP, Redis, PostgreSQL, targeting systems.
Developed and integrated modules to enhance the accuracy of advertising campaigns.
